DETAILED ACTION

Claim Objections

Claim 21 is objected to because of the following informalities: the claim recites "said polygonal cross section" which lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-8, 10-11, 13-14, 16-20, 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw et al (US 5,048,026).

Shaw et al discloses an optical fiber lasing device with all the limitations set forth in the claims, including: a core fabricated of a lasing material such as Nd:YAG (column 2 lines 50-56); a cladding fabricated of a non-lasing material surrounding the outer surface of the core (column 2 lines 56-60); a cylinder central section having a first end and a second end, the first end being terminated at a first bottleneck section and the second end being terminated at a second bottleneck section (Fig. 11).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3,9,12,15, 21, 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shaw et al in view of Dejneka et al (US 6,324,326 B1).

Shaw et al disclose an optical fiber lasing device with all the limitations set forth in the claims as discussed above, except they do not teach the use of a square shaped core. On the other hand, Dejneka et al explicitly teach the use of square core (Fig. 13). Dejneka et al states that such arrangement is advantageous because it reduces the active area of the doped core without compromising the coupling efficiently between the pump diode and the fiber (column 11 lines 43-47). Therefore, it would have been

obvious to a person of ordinary skill in the art at the time the invention was made to modify Shaw et al device to have square core.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sung H. Pak whose telephone number is (703) 308-4880. The examiner can normally be reached on Monday - Thursday : 6:30am-5:00pm.
